

Puzzle professionals are trained to recognize a wide variety of wordplay.

The clues and answers in this puzzle can be sorted into five categories:

- Normal clues whose answers are also entered normally
- Clues where one letter has been changed, but the answer remains normal
- Answers which must be scrambled before entry
- Answers where the first and last letter must be changed before entry
- Answers that must be transformed in a manner you must determine

There are exactly six of each type. All grid entries are common words.

Across
